

CPPM-RU2M-001

How to use the Template

Pink Line

This is the final visible area of your artwork once it's printed and trimmed. Keep all important design elements like logos, text, and faces inside the pink line to make sure nothing gets cut off.

Blue Line

This is extra space around the design to ensure full edge-to-edge printing. Extend your background colors and design elements right up to the blue line so there's no white edge after trimming.

Upload your design in PDF, JPEG, TIFF or PNG format.
Make sure it's high resolution and all text converted to curves (PDF) for best results!

This template is provided at 10% size.
